

ECMO is increasingly preferred to invasive ventilation in German ICUs in 2021.

High Flow grew from 9% in the first wave of 2021 to 12% in the third wave.

Non-invasive ventilation grew from 21% in the first wave of 2021 to 23% in the third wave.

Invasive mechanical ventilation went down from 51% during the first wave of 2021 to 45% in the third wave.

ECMO therapies grew substantially from 5% in the first wave to approx. 10% in the third wave.
